Survey Methodology

This survey was conducted using automated telephone touchtone technology. The sample used for this survey was randomly drawn from a Kentucky voter file. The survey response data was weighted based upon past general election voting demographics. The interviews were conducted on June 4th and 5th, 2014. Three attempts were made to interview each household in the sample. This survey has a margin of error of 3.45% at the 95 percent confidence interval.
